In this paper, I/we report on / show that:

Field	:	Supply Chain
Topic	:	Logistics
Brief Background	:	Vendor selection is a strategic activity in order to support the achievement of the company`s success and competitiveness. Significantly, the company has some specific standards in the selection
Research Problem	:	How to improve frame work selection third party lead logistics service provider
Overview of Method	:	The AHP method is used to determine the importance of the criteria, while the TOPSIS method is used to rank alternatives
Significant finding	:	From the sensitivity analysis process, it was found that the very sensitive location and price changed but did not change the selected alternative vendor. This proves that the resulting framework is reliable
