July 22nd, 2020

Dear,

I/We wish to submit an original research article entitled “Sustainable Landscape Design Concepts in Green Open Space Management: Action Research based on Soft System Methodology” for consideration by SINERGI.

I/We confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere.

In this paper, I/we report on / show that:

Topic	:	Sustainable Landscape Design by Action Research ‘Soft System Methodology’
Brief Background	:	To achieve the target of 30% of the green space area of the total area, causing Jakarta and other big cities to make efforts to accelerate the provision of green space. In fact, efforts to provide and manage it did not go as expected
Research Problem	:	The main problem is the unavailability of clear guidelines on the implementation of green space management and ineffective phasing related to the determination of terms of reference with budget constraints.
Overview of Method	:	The Action Research by Soft System Methodology
Significant finding	:	This study aims to discuss how the concept of sustainable landscape design can be bundled by governance involved in managing green space using action research based on soft systems methodology.

We have no conflicts of interest to disclose.

Thank you for your consideration of this manuscript.

Sincerely,

Silia Yuslim

AUTHORSHIP STATEMENT

I/We wish to submit an original research article entitled “Sustainable Landscape Design Concepts in Green Open Space Management: Action Research based on Soft System Methodology” for consideration by SINERGI.

All persons who meet authorship criteria are listed as authors, and all authors certify that they have participated sufficiently in work to take public responsibility for the content, including participation in the concept, design, analysis, writing, or revision of the manuscript.

Author 1
