

PERANCANGAN GEDUNG MICE KAI CORPORATE UNIVERSITY DENGAN PENDEKATAN KONTEMPORER VERNAKULAR

Yasril Kuncoro Nedi
Program Studi Arsitektur, Universitas Mercu Buana

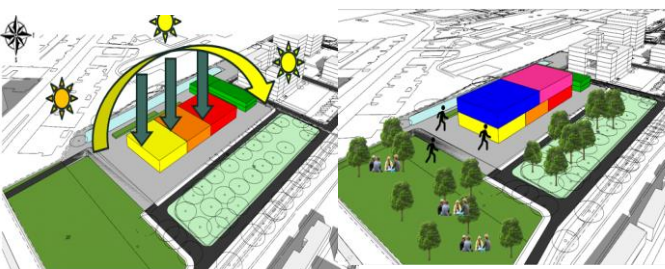

MICE KAI Corporate, located on Jl. Laswi, serves as a vital hub connecting various parts of Bandung, surrounded by business and educational centers. As a commitment to enhancing employee skills, the development of the MICE building is expected to bring significant benefits to the company and the surrounding community. Inspired by contemporary vernacular approaches, the architectural design of this building reflects the unique identity of West Java and PT. KAI, symbolizing harmony between local traditions and modern architectural advancements
